- End to End Security of Infrastructure, Middleware and Comm. channels etc.
- Role Based Access to online portal to be given to all school's admin, Merchants admin, Banks Admin, Service provider admins etc.
- Cashless system Protects merchants and banks from misuse or fraud attempts.
- It saves time and cost on Onboarding Merchants to the closed loop payment system.
- Integration to Banks Core Payment switch using ISO 8583 Messaging comm.

Closed Loop Cashless Prepaid System Project for

UNION NATIONAL BANK

**PROJECT LOCATION:
ADU DHABI,
UNITED ARAB EMIRATES**

The cashless system is very helpful for the Schools and University students because it doesn't require Students to visit Bank Branches physically to do day to day banking. Union National Bank had deployed and distributed Prepaid Debit cards to all Students of Higher College of Technology campuses in UAE.

The cashless banking system is more secure as compared to the Physical Banknotes Transactions. Furthermore, a cashless or contactless banking system is best and secure from any theft because it is not easy compared to the physical banknotes. Mostly it has been observed that the frauds and robberies are faced by the students carrying physical cash. Therefore it will be safe from frauds and robberies as well.

It has been observed that fraud of Fake banknotes which are not original and useable has been done with so many people. But while using the Union National Bank's cashless system, the ratio of robberies, theft, and fraud has been decreased up to a good level, and the business risk and costs are also reduced with the help of cashless payments.

Business Requirement:

· UNB wanted closed loop prepaid card system to benefit participating merchants with attractive transaction fees . Therefore, UNB have made it easy for them as per their business requirements.
· It will be helpful for the business because it will help them save time and get complete online data.
· The client needs closed loop card services for all HCT Students, to make sure contactless payment amidst the corona virus to ensure the safety of its users.
· They required to make sure on client's side to have all of their savings in the bank accounts and whenever they need their amount, they can use ON Campus cashless transaction method.

BENEFITS OF CASHLESS PREPAID CARD SOLUTION

1. Cashless system project will enables them to avoid the use of paper cash in all HCT branches in UAE.
2. IN-Campus transactions across all participating merchants can be done in real time.
3. There will be no need to keep cash with students always.
4. Portable and small size card.
5. Cashless system is secure and fast.
6. It is easy to manage.

SOLUTION OFFERED

• Closed loop POS terminals were On-Boarded in all Merchant locations within all Higher college of technology (HCT) campuses in UAE.

• The payment transaction speed was faster for all students during peak hours from all campus locations.

• POS Terminals were connected to UNB Banks core banking Payment switch

• Settlement and Reconciliation modules were deployed as per Banks Business requirements.

• End to End Security and Monitoring was in place to make sure all operations go smooth during business hours.

• 24X7 Call Center support was provide to UNB bank.

• The business of Merchants has been increasing day by day with the help of a cashless payment system developed by bank.

• The cost of Transactions was drastically reduced by Bank to motivate merchants.

• Student Campus card On-Boarding is instantly done by self-service kiosk activation screens in all campus locations.

Contactless Campus Cashless System Project for

BSL BANK

**PROJECT LOCATION:
BEIRUT, LEBANON**

The cashless system is an economical introduction of a cashless society for individuals. The cashless system started to give opportunities to banking institutes, businesses, companies and government worldwide.

The cashless system is an easy process of transferring money and exchange currencies. It is the best and secure process for transfer money to purchase goods and availing services.

Nowadays, the cashless payment system is growing in the field of financial development. It is a pellucid, reliable payment method and very secure.

A few months ago, the world was very upset during the pandemic condition of COVID-19, almost were countries suffering in lockdown.

Peoples do want to put money in their hands. All banks get an effort for cashless payments regarding safety precautions to follow social distance and to avoid touching any surface.

In the Cashless society, crime rates have been reduced, no crimes are seen of stealing money— cashless society providing the facility of exchange of money, no need to go out for exchange.

Business Requirement:
- The cashless payment system is more beneficial for the business environment and industrial areas.
- BSL Bank wish to introduce closed loop cashless system for some schools and colleges using their online Payment Gateway.
- Online parents' portal to top-up Students cards as and when required.
- It saves precious time of staff, instead of wait and stands in line for collecting payment from students.
- It is the demand of students and canteen staff for reducing time for counting the Banknotes and do change management.

BENEFITS OF CONTACTLESS CAMPUS CASHLESS SOLUTION

1. Cashless system project will enable them to avoid the use of paper-based Banknotes.
2. Online transactions can be done easily by parents, teachers and Students.
3. There will be no need to keep cash with students always.
4. Portable and small size card can also be used as Student ID card.
5. Cashless system is secure and fast.
6. It is easy to manage.

SOLUTION OFFERED

- Out of Box cashless engine
- Transactions can be offline and no need internet to do Transactions.
- Parents can use Parents payment portal to top-up cards using Bank debit or credit cards.
- It has a proper record of the transacted amount.
- The Bank and Schools can easily tracks the record of money transaction recorded data.
- Students can do transactions in less then 1 sec and to avoid long queues in Canteen areas during Lunch breaks.
- It will develop the business and satisfy customers and the bank.
- It is an easy and fast transaction method with speed less then 1 sec
- Bank charges have been reduced by using this service.

Cashless Prepaid System Project for

HSBC BANK MIDDLE EAST

**PROJECT LOCATION:
DUBAI, UNITED ARAB EMIRATES**

The Digital cashless prepaid system is the one in which transactions are not made by physical money or Banknotes. Instead, users get them transferred by digital means. HSBC bank has introduced the closed cashless system project for all Employees to pay using Cashless QR Based cards in all HSBC Staff Canteens in UAE. This advancement has come up with so many of the benefits to the HSBC Employees, Canteen operator business, and banking systems.

If we get into the details of why a cashless system is necessary, this kind of cashless system helps speed the transaction process. It helps avoid people from Getting gathered up in rush hours in Bank Canteen areas during lunch breaks. Thus, there is no rush around the cashier desk. We find the cashless system faster and quicker than other transaction systems and with No Transaction fee as always charged by banks.

Business Requirement:
- It is the requirement of the business for HSBC Bank for the satisfaction and happiness of all HSBC Employees.
- As we know, everyone is willing to save time and make transactions secure as well. But to prevent further threat, it is a business requirement to introduce a Closed-loop cashless system in all Canteen locations to avoid the hassle of cash from other partners.
- In business, cashless systems eliminate many threats like money or cards being stolen, theft of cash, or even robbery.

BENEFITS OF CASHLESS PREPAID CARD SYSTEM

1. Cashless system project will enable them to avoid the use of paper-based banknotes.
2. Online transactions can be done easily.
3. There will be no need to keep cash with you always.
4. Portable and small size card.
5. Cashless system is secure and fast.
6. It is easy to manage.

SOLUTION OFFERED

- A closed-loop cashless system in banks include digital and adequate financial records for all canteen transactions.
- This system ensures better tracking of the money movement.
- All HSBC Staff can Top-up canteen cards online or via Top-Up Kiosk Stations placed within all Canteen outlets.
- Transactions are very fast takes less then 1 sec.
- Out of Box system with quick deployment.
- Highly Secured and encrypted technology.
- Online reports can be pulled from Web portal by all HSBC Admin, Staff and Canteen operator admins.

Cashless Campus Prepaid System for
ABU DHABI EDUCATION COUNCIL

PROJECT LOCATION:
ADU DHABI,
UNITED ARAB EMIRATES

Abu Dhabi's education council's primary role is to develop the education system and promote a culture of creativity and excellence to students' betterment. In the UAE, neighboring countries like Saudi Arabia have moved into a network of online payments, an excellent alternative to credits and debit cards. The cashless system is essential in educational institutions.

Business Requirement:
· Schools, colleges, and universities have worked hard to move them on digitizing the curriculums they deliver to students.
· Parents and students can feel frustrated by the long process of queues at school accounts departments.
· The management bears challenges for the accounts, and the finance department is tracking who has paid fees and who has not.
· The challenge is for that finance person that they are not sure who they need to chase and how much is outstanding from the parents.

BENEFITS OF PREPAID CAMPUS CASHLESS SOLUTION

1. The finance department has to collect thousands of cheques from the parents, and there can be a problem in tracking the cheques that leads to a lot of frustration because people are very busy.

2. It becomes more complicated because people are travelling; they need to pay in cash or by cheque where they physically have to go into the school.

3. The main benefit of a cashless system is the misuse of lunch money through spending in shops.

4. Monitoring of the number of meals consumed by the cashless process.

5. Parents get reports regularly saying how that money was utilized by students.

SOLUTION OFFERED

• Out of box system and very easy to use

• Offline payment transaction engine does not need internet connection to do transactions.

• There is also an advantage for the school to reduce cash and cheque handling costs.

• Transaction speed is now less then 1 sec per transaction hence no more long queues during peak lunch break hour.

• The cashless system is a powerful cafeteria management tool.

• Faster transactions and queuing times are reduced through increase speed of services.

• Time and attendance at the bus or school gate are implemented for monitoring and student movement within the campuses

• It saves time for both parents and students by using the cashless system, and there are many more advantages.

THE BRITISH INTERNATIONAL SCHOOL
ABU DHABI
A NORD ANGLIA EDUCATION SCHOOL

Case Study

Cashless System for
BRITISH INTERNATIONAL SCHOOL

PROJECT LOCATION:
ABU DHABI, UNITED ARAB EMIRATES

British International School, Abu Dhabi, UAE had introduced a cashless system to all its schools. They aim to make the whole system cashless. To avail of these benefits, all parents and students should get registered. Multiple users like parents can use one account, and students can use the same account which will be mapped to prepaid smartcards. The school has made cashless cards for all students with their details.

Now Students can use these Prepaid payment cards to pay bills in school and parents can reload the cards by using their debit/Credit cards online via parents' payment portal.

BUSINESS REQUIREMENT

Going cashless is a new trend in the modern world. Mostly business people, either big or small, are inclined to this method of payment. Primarily schools are also switching to these cashless cards. As it is less time consuming and the fastest way for payments

According to the survey, 80% of schools use this system for parents to pay their dues. It's easily manageable. In this way, the money will be safe and secure; now, students will not spend or waste their changed money, buying unhealthy snacks from outside school.

This system is also helpful in keeping the record of students' educational expenditures. It formalizes all the transactions done by parents for students.

SOLUTION OFFERED

1. The cashless system is need of hour—modern problems in smart solutions. Now parents or students don't need to line up in the queue for paying school fees and other fees like Events, trip, canteen payments etc.

2. The cashless card system reduces the risk of theft or fraud as it is secured with digital Encrypted prepaid smartcards. So it lowers the crime rate. It also facilitates both the Student and School Administration.

3. One more benefit is hygiene, as in corona times, many types of research show these viruses can spread from Banknotes because Banknotes circulates from one hand to another many times a day.

4. For switching to this system, all parents need to do is reload their account anytime they want. And submit these school payment dues online with their comfort zone.

Cashless System for
DELHI PRIVATE SCHOOL (DPS)

**PROJECT LOCATION:
DUBAI, UNITED ARAB EMIRATES**

The campuses of the Delhi Private School want to establish the best services for their students. Accordingly, they will motivate them to study and work harder for their future. They have invested in many technologies in order to make the student life optimized and handy.

Business Requirement:
Actually, students often face many risks related to cash. They are always in danger during their years of study. They can easily become victims of robbery or they can be scammed online easily. Experts confirm that thousands of students are manipulated during their school life. The physical money represents many threats to the life of a student. Moreover, they often spend a lot of time in the line of waiting when they want to make their canteen payments during Lunch Breaks. Either we are talking about the school life payment or outside the campus routine too. They need an alternative that can make their transactions more effective.

BENEFITS OF CONTACTLESS CASHLESS PAYMENT CARD SYSTEM

- Super-fast and instant transaction
- Secure and safe transactions
- Events payment collection made so easy
- Very handy prices which makes it adequate to students
- No restriction or limitation of the type of the card or the method the student uses
- It can optimize a lot of time and money for the student & payments
- Students and parents can check card balances and can also track all payment transactions history via online payment portals.

SOLUTION OFFERED

Cashless payment can eliminate a lot of risks related to payment. It finally makes an ultimate end to cash robbery, counterfeit money and many other problems related to physical cash problems. In addition to that, the cashless money is a great way to reduce your cost, especially for student life situations. Besides, the speed of transactions si over the top of expectations.

Efficiency and reliability are also among the best features of cashless payment technology. Now, the new payment method is invading the universities and campuses around the world. The student will surely take advantage of the cashless payment method without any doubt.

LFigp

Cashless System for
LYCÉE FRANÇAIS INTERNATIONAL SCHOOL

PROJECT LOCATION:
DUBAI, UNITED ARAB EMIRATES

Schools and Universities are responsible in bringing a huge interest for students in order to provide them with their needs during their years of studies. This is including all the aspects of their student life.

Business Requirement:
Actually, making a financial transaction for a student can make them spend a lot of time and money. As a student, they will be wasting a lot of resources on fees and the high cost of transactions. In addition to that, they may face some problems with security and cyber frauds too. Many students do not have the experience to deal with the security related to their money during transactions. School wanted to digitize all payments to speed up Canteen Transactions and was looking for a reliable and robust Prepaid cashless payment system.

BENEFITS OF SCHOOL CONTACTLESS CASHLESS SYSTEM

- Very practical and easy to use the method
- It can optimize the fees and the costs of the money transactions
- It is very safe and students will be always safe from manipulation
- Students can send as much as they want when it comes to payments
- Fast less then 1 sec transaction time, hence queues in School canteen can be super fast and students will get enough time to eat their meals in lunch breaks.
- It is very friendly with the environment

SOLUTION OFFERED

A new cashless system is taking place. Thanks to the advanced offline smartcard technology, students are going to be safe while they make their daily canteen transactions. Truth be told, they will be able to purchase what they want in the campus canteen and many other places for very low pricing without any additional transaction fees etc.

The new smartcard based payment method is also super easy to use. You can use it with your smartcard prepaid card payment method in the virtual world. Moreover, we can say that the fewer contact students established with others, the safer they become. Especially during such period of COVID-19 pandemics. The virtual method of cashless payment is protecting the student around the world from the deadly COVID-19 virus. This is because there is no direct contact with others and cash bank notes too. As result, the students and teachers are going to be safe during school life.

Global Indian International School

Cashless System for
GLOBAL INDIAN INTERNATIONAL SCHOOL
PROJECT LOCATION:
DUBAI, UNITED ARAB EMIRATES

Global Indian International School (GIIS) is a part of the Global Indian Foundation, which has many schools, educational institutions, and cultural centers in countries like Singapore, India, New Zealand, Malaysia, Thailand, Japan, and Vietnam. As a forward-thinking and academically ambitious school, with a strong international dimension, GIIS Dubai strives for an innovative and imaginative academic curriculum. Their academic life is complemented by attentive pastoral care and full and wide-ranging co-curricular and extra-curricular programmers. GIIS Dubai is a unique school where students are nurtured with the best of Indian and international education systems blended with Indian value systems.

BUSINESS REQUIREMENT

The client needs a closed-loop Card system that will allow the children to deposit their school fees through that card rather than doing it through paper cash or as cheques. Taking the fees through paper cash can be time-consuming and difficult to administer and account, so an alternate way of the card is needed.

SOLUTION OFFERED

GIIS schools have earned for themselves an outstanding reputation for excellence in holistic education throughout the Asia-Pacific region. Nurturing students for the future is one of the key focus areas for the GIIS schools, which ensures that ample opportunities, mentoring & guidance are provided to students to excel in entrepreneurship, leadership, teamwork, group dynamics, and academics. GIIS has selected iBonus solution to a prepaid card solution. So one card each given to students and employees of the school, an ID card and prepaid card/Debit card. They can use this in their library and food court, which speeds up the cafeteria transactions reduces time, error, and loss associated with accounting for cash. Now students need not worry about having enough lunch money again and it is safer than cash, no more lost or stolen cash. It is very convenient also as now there is no more fretting about having change every day and such activities enhance school branding/school spirit among the students. Therefore, it is a win-win project for the student, their parents, the employees, and the school. iBonus System matched the pace of fast deployment as required by them and was ready to use in a record 1 week time Duration. iBonus system had all the features of what this project is needed. The technical Consultant team at AVI INFOSYS LLC designed and deploy the entire project in a record 3 days' time.

The card will be specially made for this institution and would be only used here. There would be no loss of money or data through this system, as the card system is made by taking into account all the security threats.

Seeing the Covid-19 affect the health of the people around the globe, this card would promote the contactless payment of dues to avoid any chance of the virus spreading. It will also ease the jobs of the accountants and the people in the administration office.

Cashless System for

AL-ITTIHAD SCHOOLS

**PROJECT LOCATION:
ABU DHABI, UNITED ARAB EMIRATES**

Al-Ittihad Private School system is a vibrant school system with highly qualified educational professionals worldwide. It's an American education system that delivers a quality education system in Abu Dhabi . As an international school system and providing a distance learning system, Al-Ittihad School System needs a cashless system for running it more successfully.

Business Requirement:

· In today's world, a cashless system is mandatory to run a business.
· Digitalization has made it more accessible for people to do their mobile phones, credit cards, and online banking system.
· It also means more profit for an organization.
· Cashless system also increases the trust and loyalty of the customers.
· The cashless system gives the organization peace of mind and costumers that transactions are completed safely and quickly.

BENEFITS OF CONTACTLESS CASHLESS SYSTEM

1. Cashless system project will enable them to avoid the use of paper cash.
2. Online transactions can be done easily.
3. There will be no need to keep cash with Students always.
4. Portable and small size card.
5. Cashless system is secure and fast.
6. It is easy to manage.
7. It is quick and time saving payment method to avoid long queues in School Canteens during rush lunch break times.
8. Cashless system lowers the chance of robbery and counterfeit money.
9. It reduces the efforts of transporting and counting the cash in central finance departments with schools.

SOLUTION OFFERED

• A cashless system is beneficial for the Al-Ittihad Schools because online payment applications will significantly lower the time, effort, and expense required compared to physically collecting and chasing cash payments from pupils and parents.

• A cashless system will also allow Al-Ittihad School staff to request, collect, and record payments as a fee significantly more comfortable and efficient manner through user-friendly software packages. It will also significantly reduce the cost and environmental effects of sending hundreds of reminders to submit fees to parents.

• For most parents, it isn't easy to make punctual payments to schools in short notice.

• A cashless payment system will help parents with direct notifications when fees need to be paid and offers a quick and easy way to transfer funds.

• It will also help parents' budget for school costs and manage regular payments without sending cash or visiting the school for fee payment.

• Worldwide school systems, especially in the UK, the US, Japan, and Australia, seeking a faster and more efficient way to collect regular payments are turning to innovative online solutions to make convenient, safe, and secure payments to fulfill all the expenditures schools. So it's the right time for the Al-Ittihad School System to introduce a cashless system as it needs a digitalized and contactless money system of the modern world.

Cashless System for
AL YASAT SCHOOL

PROJECT LOCATION:
ABU DHABI,

Canteen Meal Card Management System for

ECOLOGY INTEGRATED SERVICES

PROJECT LOCATION:
KANDAHAR AIR FIELD (KAF) – US AIRFORCE BASE CAMP, AFGHANISTAN

Gone are the times when meal management at canteens was a hectic job to do. We understand that management of menus, orders and consumptions can be a challenging task. Thus, we need a Canteen Meal Management system for the proper record and management of consumptions. Here, we have come up with Canteen Meal card Management System solutions.

Following are the solutions which a Canteen Meal Card Management System blesses us with.

Business Requirement:

· A system that provides all the statistical record and controls of Meal Consumption in Canteens.
· Company management can properly track menu items as well as their quantities. By the Meal Card management system,
· Admin users can easily choose menu item of their choice simply on their android devices.
· The challenge of canteen meal management can also be tackled with this system by managing meal vouchers transactions.
· This system ensures that almost all the menu orders are pre-paid. It even saves the paid receipt directly in the card.

BENEFITS OF CANTEEN MEAL CARD MANAGEMENT SYSTEM

1. Canteen meal card management system providing post-paid and pre-paid accounting options for users to make canteen operations cashless.

2. The pre-paid account users are supposed to recharge their smart cards in advance before they order something.

3. Post-paid users can utilize any of the credentials including fingerprint, proximity card or smart card to order food.

4. This system can work both online and offline.

5. It allows proper management of the meal vouchers as and when needed.

SOLUTION OFFERED

• To understand that management of menus, orders and consumptions can be a challenging task.

• Canteen Meal Management system for the proper record and management of consumptions of Meals in Canteens.

• If we are availing Canteen Management System, then it can even reduce the time to be wasted in making long queues and the transaction time.

• Users can conveniently plan different menus for breakfast, lunch, dinner, special days and different occasions.

For more than fifty years Supreme Group has provided critical, life-sustaining services that empower military forces to accomplish missions in challenging and austere environments around the globe.

The legacy began in 1957, when a former US Army foodservice soldier recognized the need to provide food supply solutions to US military installations in Germany. After demonstrating unparalleled quality and efficiency in supplying US troops, Supreme Group expanded into the Middle East, supplying United Nations operations in Egypt and Lebanon.

In the 2000's, the rising tensions and ongoing conflicts in Iraq and Afghanistan provided Supreme Group with further opportunities to provide military forces with the supply chain network and service solutions that improved performance and quality of life while in theater.

During this period, Supreme developed the industry's most efficient fuel supply, storage, testing and delivery systems, effectively powering the US, UK, and UN security forces both in the air and on the ground. Supreme demonstrated total solutions capabilities by building, supplying, operating and maintaining storage and living facilities from the ground up, outside the wire.

Supreme Group adopted new technology for canteen meal card management solution in the year 2008. Administration of Supreme MMS wants to get rid of the burden from the manual cash handling and billing process, so they had decided to shift on an automatic canteen meal swipe management Solution for all US Army and US Airforce DFACs in Afghanistan and Iraq.

Contactless Cashless Event Prepaid Card system for

SUNBURN MUSIC EVENTS

PROJECT LOCATION:
MUMBAI, BANGALORE, PUNE & GOA EVENTS, INDIA

Sunburn music & dance events has a very wide echo in India. It has been always a source of joy for many people around the country and the world. The upcoming events are going to rock the world by their beats for sure. The music & dancing event always works on satisfying their visitors from around the world.

Business requirement

· Sunburn event management group find some barriers when it comes to buying tickets for their future visitors and also to manage F&B payment transactions in all event locations. Especially when so many visitors gather in one location. POS tills always have technical issues when customers want to pay online using Bank Debit cards or credit cards on all Arena Locations.

· Counting Banknotes and do change management takes a lot of time and organizers have less sales and cash collection due to this delay.

· Many times, it is bad experience for guest to stand in long queues and waste a lot of time to get F&B supplies during any live events.

· Proper Inventory control and monitoring is also a major change as without digital control there is always chances of theft and misuse of brewages stocks etc.

· It is always a need to have an offline payment transactions technology which can still work without network or Internet availability.

BENEFITS CONTACTLESS CASHLESS EVENT PREPAID CARD SYSTEM

1. It will reduce the time of the transaction and increase sales by 30%.
2. Very handy and trusty way to spend your money to the Sunburn events in digital way.
3. Organizers get access to all live reports during event and can do more On-Site promotions to increase sales on the spot.
4. It relies on a very secure system of encryption of cards with latest 3DES Encryption Algorithm.
5. It provides all digital data of all transactions and does not allow anyone to manipulate any transactional data.
6. Final Settlement on demand reports is always available on the spot with no manual manipulations etc.

SOLUTION OFFERED

· Deployed many Top-up Stations and POS Transactions terminals around all live Arena locations.

· Offline payment transactions technology which can still work without network or Internet availability.

· Instant activation and distribution of cards, does not need any special skill set or technical knowledge to operate.

· All Transactional Data can be sent back to Backend Servers in delayed manner without need of any expensive internet connection or network infrastructure.

· Another advantage of the prepaid system is that clients can make their purchases in zero delta time. The transaction can take place instantly without the need for any additional paper process. Everything can be done in a virtual way. As result, locals and tourists can finally come to Sunburn dance events without any problems.

· With the new implementation of the offline prepaid cashless POS terminal systems, the clients can pay in advance and can Top-up Prepaid events cards from all available Top-up Stations within the live event locations.

· Tap& Go sales Transactions had made all operations so smooth and fast Moreover, they can make their transaction in a very secure and safe way. The prepaid system is relying on a high level of encryption technology. Like that, you will be always protecting your data and payment information from a third party.

· Organizers get access to all live online portal reports during event and can do more On-Site promotions to increase sales on the spot

· Final Settlement on demand reports is always available on the spot with no manual manipulations etc.

Cashless System for

JEDDAH WATERFRONT

PROJECT LOCATION:
JEDDAH, SAUDI ARABIA

Jeddah has been always the top attractive destination in Saudi Arabia. The government always works hard to make the city more attractive than ever before in the gulf area. Year after year, it brings new innovative ways to keep the citizens, Visitors and investors satisfied with what the giant city offers. In fact, the Jeddah waterfront want to give the best quality of services to the visitors.

Business Requirement:
The city is receiving a huge amount of offers for projects for many local and foreign investors from around the globe after Govts PPP Initiative. The Jeddah waterfront is one of the top sites that gain huge popularity in the entire country due to its close proximity to Macca pilgrimage. It privies the top facilities to their visitors. However, the payment system for all paid facilities was facing a lot of complications due to heavy footfall of visitors. Especially when we talk about the traditional ways of payment. People in Jeddah waterfront were complaining a lot about the classical payment method there. They have been asking for a new and effective method to pay in the whole Jeddah waterfront areas with speed and accuracy to clear long queues in all paid facilities areas like Public Toilets, Kiosk Sales points, Paid VIP Smart Toilets and Paid Recreation Facilities next to Beach fronts.

BENEFITS OF CONTACTLESS CASHLESS PREPAID CARD SYSTEM

• Very fast Digital Transactions service

• You will get rid of the technical problems related to the payment processing.

• No more bank notes change problem

• Digital auto debit based Digital Access control method to enter all paid facilities with in Jeddah waterfront

• A very effective and reliable method of payment In Jeddah waterfront public facilities .

• Long queues of Visitor payments can be processed in less then 1 sec per transaction.

SOLUTION OFFERED

Today, with the development of the new cashless payment card method, locals and foreigners visiting Jeddah waterfront are very satisfied with the fast-Digital Payment service. The technology can be used to pay for all paid facilities No matter you have change of Bank notes in your pocket or not you can purchase anything or any service in the Jeddah waterfront. There is no restriction when it comes to the amount of money you spend their using closed loop payment card system. In addition to that, the transaction can be very secure comparing to the classic method. You can rely on a very effective and instant payment and transaction during your stay in Jeddah waterfront. All Public Toilets and facilities are controlled by cashless prepaid access control gates and all Visitors are now happy with speed, Security and Digital Access method to make use of all paid facilities.

Dubai Electricity & Water Authority

RFID based EXPO
Kiosk Solutions for
DUBAI ELECTRICITY AND WATER AUTHORITY
During GITEX Week

**PROJECT LOCATION:
DUBAI,
UNITED ARAB EMIRATES**

"DEWA's participation in GITEX 2016 introduced customers to its new smart services, and initiatives aimed at achieving their happiness. This supports the vision of HH Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, to transform Dubai into the smartest and happiest city in the world, and the Dubai Plan 2021, to make Dubai a smart, integrated, and connected city with a proactive government which is creative and capable of meeting the needs of individuals, and society as a whole," said HE Saeed Mohammed Al Tayer, MD & CEO of DEWA.. RFID drives synchronization to its visitors by providing Smart RFID watches. About 50 smart RFID watches are distributed to their members.

Dubai Electricity and the water authority is a partial client of AVI Infosys service that can potentially provide multiple levels of real-time information to all participants in the supply chain.

In order to enhance communication with GITEX's visitors, and encourage them to use DEWA's smart services, DEWA is giving away 15 prizes every day, through a daily raffle. Visitors need to register through DEWA's app, or complete any smart transaction on the app. Stand visitors can also win prizes, if they bring the specially created smart watch band sticker insert from Al Bayan or Khaleej Times and have it scanned at DEWA's stand.

DEWA had also award 10 lucky winners of the grand prize raffle draw, and will give away 30 prizes as part of the daily raffle draw, in addition to a number of other valuable prizes.

Business Requirement:
- Organize an RFID solution system to work as tracking technology. Radiofrequency identification (RFID) to increase footfall in DEWA GITEX Stand with innovative RFID Digital Raffle draw ideas.
- Required the technology that uses RFID readers and RFID tags to visitor identification .
- DEWA experienced makes GITEX Expo visitors more exiting and engaging.
- DEWA RFID Expo Kiosk system to accept multiple tag taps as required to control and clear massive cloud with one tap RFID solution.

BENEFITS OF EVENT RFID KIOSK SOLUTION

1. Dubai Electrical and water authority's RFID technology is able for better user experience for all GITEX Expo visitors

2. It increased general public participation and increased footfall during GITEX EXPO.

3. The RFID system excited all visitors to automatically and instantly show RFID tap results in front of public in big LED TV Screens.

4. RFID sticker in form of paper Watches were distributed in all major newspapers.

SOLUTION OFFERED

- RFID Sticker based paper watches were distributed to general public via UAE based leading English and Arabic newspapers.

- RFID Kiosk were placed in DEWA stand which had RFID offline readers to accept and match winning RFID UID of all Smart watch tags.

- Dubai electrical and water authority using RFID technology to pull massive crowd was featured in all news channels and news papers to get best media attention .

- Online reporting of all winners was provided to DEWA marketing team for analytical purposes.

Club Membership system project for

AVIATION PROFESSIONALS CLUB- APC

**PROJECT LOCATION:
DUBAI, UNITED ARAB EMIRATES**

Since 2000, the Aviation Professionals Club (APC) has been the leading lifestyle club for pilots. Established by pilots for pilots, APC complements the lifestyle of our members by offering a wide range of benefits as well as organizing social, sporting and leisure opportunities for our members in the United Arab Emirates as well as down-route around the world.

APC membership is open to all pilots who work for airlines across the UAE including Emirates Airlines, Etihad, Fly Dubai, Air Arabia and Dubai Air Wing etc. Air Traffic Controllers and selected top level management within the airlines are also eligible for membership. The club currently has approximately 7,000 adult members.

The APC is run by a Committee of members, led by an Executive Board consisting of the Chairman, Vice-Chairman and the Treasurer. The Committee meets on a regular basis to manage the affairs of the club.

APC is a leading professional club for pilots across the UAE, established in 2000, the company has 7000 registered adult members till now who are provided lavish lifestyles and luxurious services including fitness, food and entertainment.

Business Requirement:
- The client wants to get rid manual attendance and Head count management and wish to digitize this by branded APC membership smartcards.
- Using smartcard-based system access control policies can be enforced for better control, monitoring and reporting purposes.
- It provides analytical information of where and when members are going.
- It helps to provide correct visit reports and payments from club will be paid based on members facility/Outlet Access and by head counts as well.

BENEFITS OF SMARTCARD BASED CLUB MEMBERSHIP SYSTEM

1. It makes members experience better by doing Digital Check-in in all participating merchant outlets/Facilities.
2. It reduces the effort of management in taking records of every outlet or partner visit details.
3. It eliminates the risk of carrying cash for members
4. Members can carry cards and can use as and when required.
5. It Saves time to get digital access to any partner outlet location
6. It Improves administrative efficiency.

SOLUTION OFFERED

- To encounter the problem we developed a smart card that stops the use of cash and introduces a cashless system.
- Offline terminals were deployed in all leading partner locations.
- These cards are made with the latest technological features
- Offline membership terminals does not need internet connection to do CHECK-IN transactions.

- Rather than carrying multiple cards in your pockets, it provides one card for your every partner visit needs
- These cards avoid any sort of human contact as all cards are absolutely contactless.
- All online head count and outlet wise reports are provided for better visibility, monitoring and control.
- It is only specified to use for our services with completely secure and privileged system.
