Make Digital Transformation Possible

Google Cloud Partner
Managed Service Provider

Your Trusted Partner for Digital Transformation

CloudMile is a leading cloud and AI company in APAC empowering businesses to accelerate their digital transformation through cloud technology and machine learning. CloudMile leverages the combination of cloud, AI, machine learning and big data analytics to provide powerful solutions to businesses across different sectors. Our solutions help enterprises maximize the efficiency of the cloud by integrating enterprise data with cloud architecture design.

✔ Supporting 700+ Customers

Cloud and AI customers in Singapore, Malaysia, Taiwan and Hong Kong

✔ Google Cloud's Top Tier Partner

CloudMile is 1 of 40 Managed Service Provider(MSP) credited by Google Cloud

✔ 130+ Google Cloud Professional Certifications

Earned Specialization in Infrastructure, Cloud Migration, Machine Learning, Data Analytics and Work Transformation

End-to-end Cloud Services for Accelerating Growth

IT Modernization

We can plan and build the most suitable cloud architecture based on the enterprise needs of different industries. Our services include virtual machine (VM)/ database migration, hybrid/multi-cloud environment setup, disaster recovery and backup.

Big Data & Data Analytics

Our Data Lab Solutions offer data transformation solutions, including data integration, customer data platform (CDP), business intelligence tools and data governance, to solve data silos and analytics challenges. We help data-driven enterprises make strategic decisions.

AI/ML Application

Our machine learning team creates customised AI applications for enterprises, including customer lifetime value prediction analysis (pLTV), customer tagging and segmentation and AI recommendation. We leverage big data to drive the business value of AI, especially in eCommerce, media, logistics, and manufacturing.

Application Modernization

As the trend of DevOps and microservices development culture continues to grow, we assist businesses in accelerating application containerization, large-scale application migration, API management and DevOps implementation.

Cloud Security

We follow ISO 27001 to create a comprehensive cloud security environment. Our security services include data encryption, network security, zero-trust principles, SIEM, and cloud security health checks.

Cloud Managed Services

We offer cloud strategy consultation, optimization, and maintenance, including cost optimization reviews. MileLync, our cloud management platform helps manage costs and optimize resource utilization through easy integration and visualization of cloud assets.

Work Transformation

We provide consulting services, technical migration to the cloud-based productivity tool Google Workspace, including technical managed services and security permission settings, education and training, as well as Chromebook device equipment and discounts.
