

Warehouse & Inventory Management in Next Generation

In the rapidly shifting market, Digi-WMS Warehouse Management System is essential to meet the complex demands of logistics and fulfillment. Outdated tracking methods, data silos, and the lack of mobile solutions hinder efficiency and decision-making, especially in managing perishables and cross-border e-commerce logistics. Modern businesses need agile, error-resistant systems to maintain compliance and keep up with the fast pace of the logistics sector.

Value Proposition

- Streamlining processes from stock-in to shipping, enhance efficiency, save valuable time and minimizes errors.
- With precise tracking capabilities, optimizing inventory management to ensure that no stock is wasted or misplaced.
- Our system upholds compliance with best practices for managing perishable goods, aligning with industry regulations.
- As your business expands, our WMS adapts scalability by supporting new warehouses, users, and types of inventories.

Functions and Features

- Simplified Inbound Booking: A vendor-friendly interface simplifies shipment management.
- Comprehensive Information Management: Captures critical details such as PO, SKU, and package information.
- Efficient Data Entry: Streamlines data entry with Excel import functionality.
- Inner Level Management: Offers meticulous organization and tracking of inventory.
- Expiry Date and Production Lot Management: Guarantees timely shipping and reduces the risk of expired stock.
- Real-Time Mobile Updates: A mobile app enhances productivity with instant data updates and on-the-go operations.
- Multi-Warehouse and Multi-User Support: Facilitates coordinated operations across various locations and teams.

- Extensive Reporting Capabilities: Provides valuable insights through detailed reports to support strategic decisions.
- Barcode/RFID Integration: Ensures accurate and speedy inventory tracking.
- Mobile Accessibility: Empowers staff to manage operations remotely, ensuring flexibility and responsiveness.

下一代倉庫和庫存管理

在迅速變化的市場中，Digi-WMS 倉庫管理系統對於滿足物流和履約的複雜需求至關重要。過時的跟蹤方法、數據孤島和缺乏移動解決方案阻礙了效率和決策，特別是在管理易腐物品和跨境電商物流方面。現代企業需要靈活、抗錯誤的系統來維持合規性並跟上物流行業的快節奏。

價值主張

- 從入庫到發貨的流程簡化，提高效率，節省寶貴時間並最小化錯誤。
- 憑藉精確的跟蹤能力，優化庫存管理以確保沒有庫存被浪費或放錯位置。
- 系統遵守管理易腐商品的最佳實踐，符合行業規定。
- 支持新倉庫、用戶和庫存類型來適應可擴展性。

功能與特點

- **簡化的入庫預訂**：供應商友好的介面簡化了貨物管理。
- **全面的資訊管理**：捕獲關鍵細節，如 PO、SKU 和包裝信息。
- **高效的數據輸入**：通過 Excel 導入功能簡化數據輸入。
- **內部級別管理**：提供精細的組織和庫存跟蹤。
- **有效期和生產批次管理**：保證及時發貨並降低過期庫存的風險。
- **實時移動更新**：移動應用程式通過即時數據更新和在途操作提高生產力。
- **多倉庫和多用戶支持**：促進各個位置和團隊之間的協調運作。
- **廣泛的報告功能**：通過詳細報告提供有價值的見解以支援戰略決策。
- **條形碼/RFID 整合**：確保準確且快速的庫存跟蹤。
- **移動可訪問性**：授權員工遠程管理操作，確保靈活性和響應性。

安排演示

立即聯絡我們進行演示，並探索我們的數位解決方案如何徹底改變您的貨運和物流營運，使流程更加智慧和自動化。

聯繫方式

感謝您考慮 DigiLogistics Technology 作為您的數字化轉型合作夥伴，我們期待與您合作！
